

Quick Installation Guide

This guide describes how to install the Smart WiFi & APP. Including APP download, register an account, create PV plant. In order to prevent improper operation before use, please carefully read this manual.

1 WiFi Stick Installation

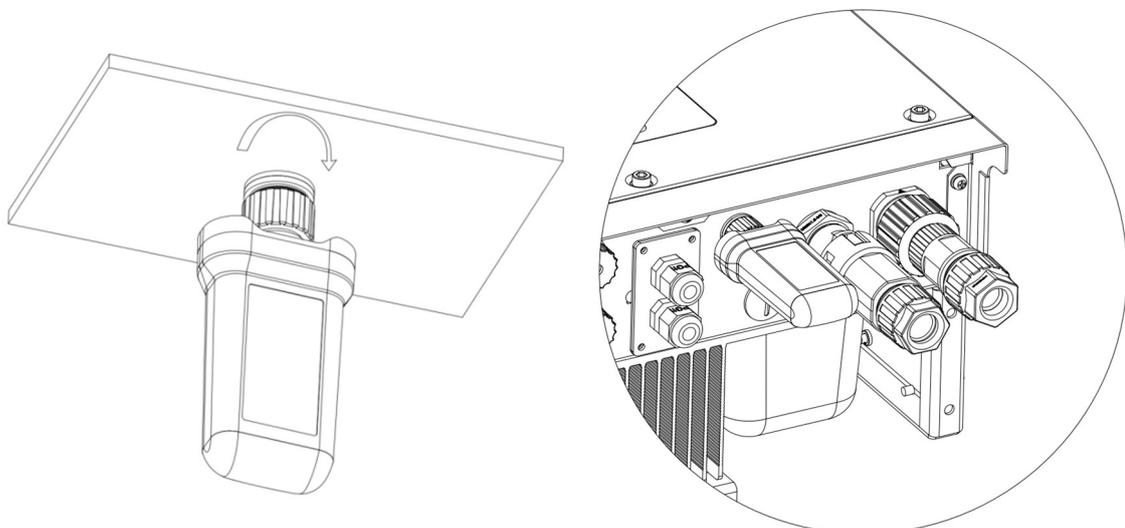

Step 1:

Plug the Smart WiFi into WiFi/GPRS port under the bottom (underside) of the inverter. Please make sure the label side of the Smart WiFi is in front.

Step 2:

Tighten the nut clockwise as following.

Step 3:

Power on the inverter (in accordance with the start-up procedure detailed in the inverter installation manual).

2 APP Installation

Scan the QR Code below to download and install the PV HUB APP on your smartphone.

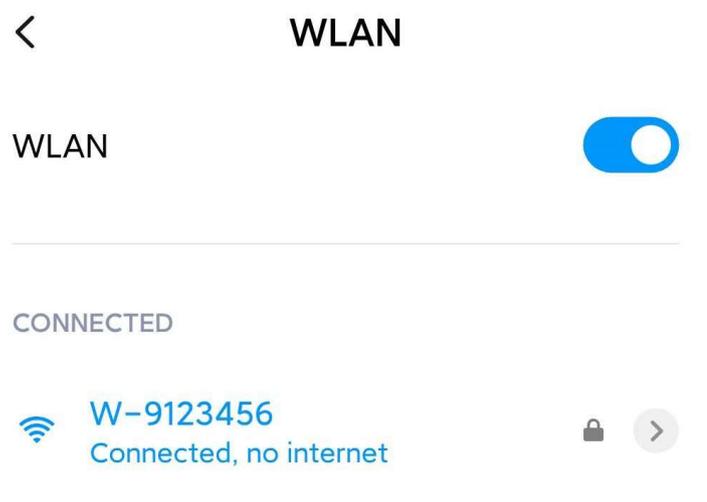

3 Configuration

For Smartphone Users

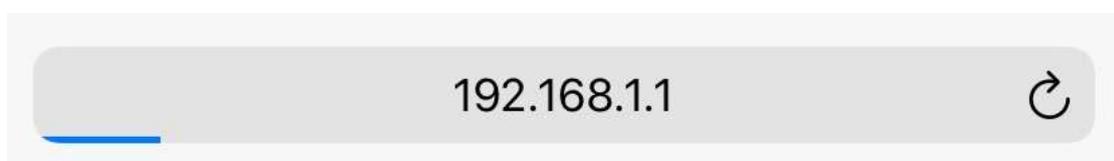

Step 1:

Connect your mobile device with Smart WiFi. The SSID of the Smart WiFi is 'W-xxxxx' and the password is 'mtmt2020'.

Step 2:

After connecting successfully. Open any browser and enter '192.168.1.1' on the address bar on top.

Step 3:

Scroll down in the WiFi SSID menu to find house router and input the house router's password. Click 'Save'.

Upgrade Clear

For Computer Users

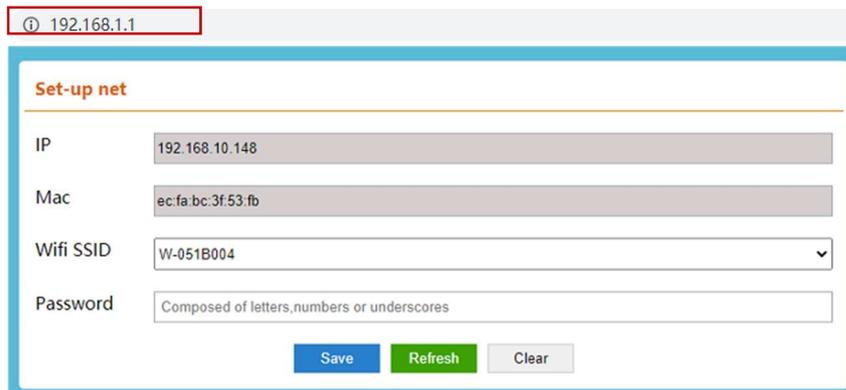

Step 1:

Connect your PC or Laptop with Smart WiFi. The SSID of the Smart WiFi is 'W-xxxxx' and the password is 'mtmt2020'.

Step 2:

After connecting successfully. Open any browser and enter '192.168.1.1' on the address bar on top.

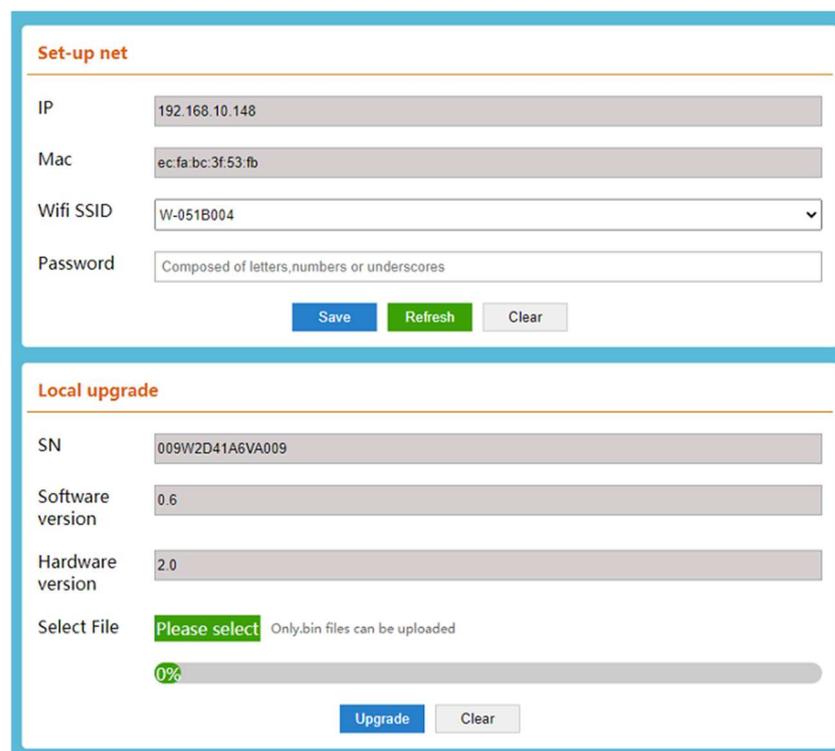

The screenshot shows a web browser address bar with '192.168.1.1' entered. Below the address bar is a 'Set-up net' configuration page. The page has a light blue border and contains the following fields:

- IP: 192.168.10.148
- Mac: ec:fa:bc:3f:53:fb
- Wifi SSID: W-051B004 (dropdown menu)
- Password: Composed of letters,numbers or underscores

At the bottom of the 'Set-up net' section are three buttons: 'Save' (blue), 'Refresh' (green), and 'Clear' (grey).

Step 3:

Scroll down in the WiFi SSID menu to find house router and input the house router's password. Click 'Save'.

The screenshot shows the 'Local upgrade' section of the configuration page. It contains the following fields:

- SN: 009W2D41A6VA009
- Software version: 0.6
- Hardware version: 2.0
- Select File: Please select (green button) Only.bin files can be uploaded

Below the 'Select File' field is a progress bar showing 0%. At the bottom of the 'Local upgrade' section are two buttons: 'Upgrade' (blue) and 'Clear' (grey).

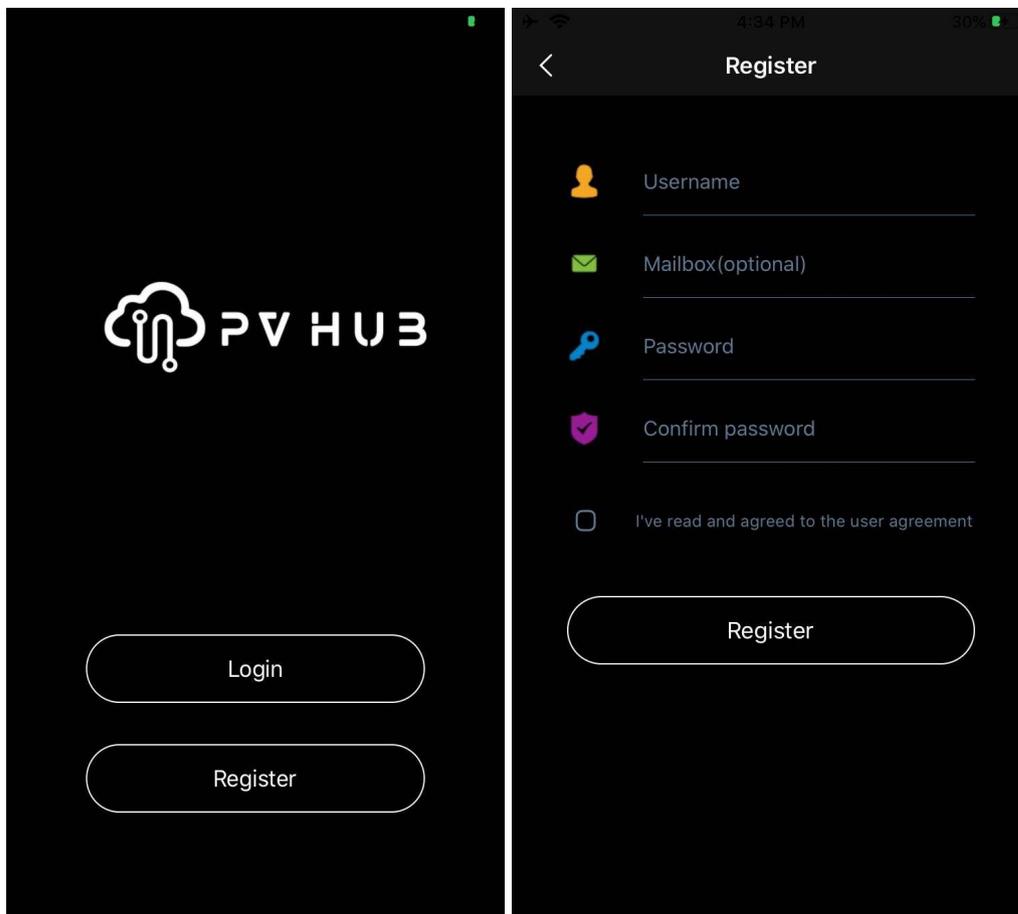

4 Registering As An Installer Account

For Smartphone Users

Step 1:

Please click 'Register', enter installer's information and click 'Register' to complete the installer account registration.

Note: * If you already have an installer/agent account, please press login and enter with your installer/agent account directly.

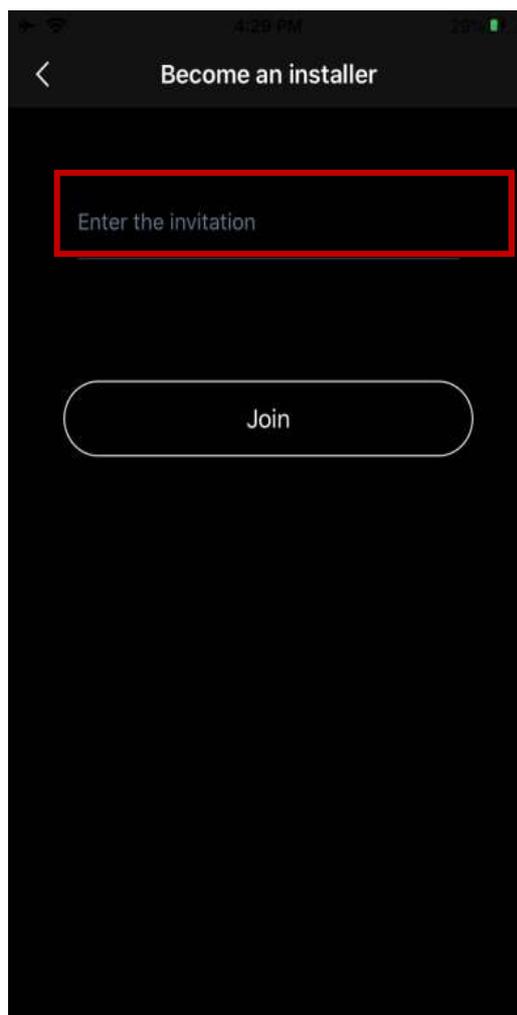

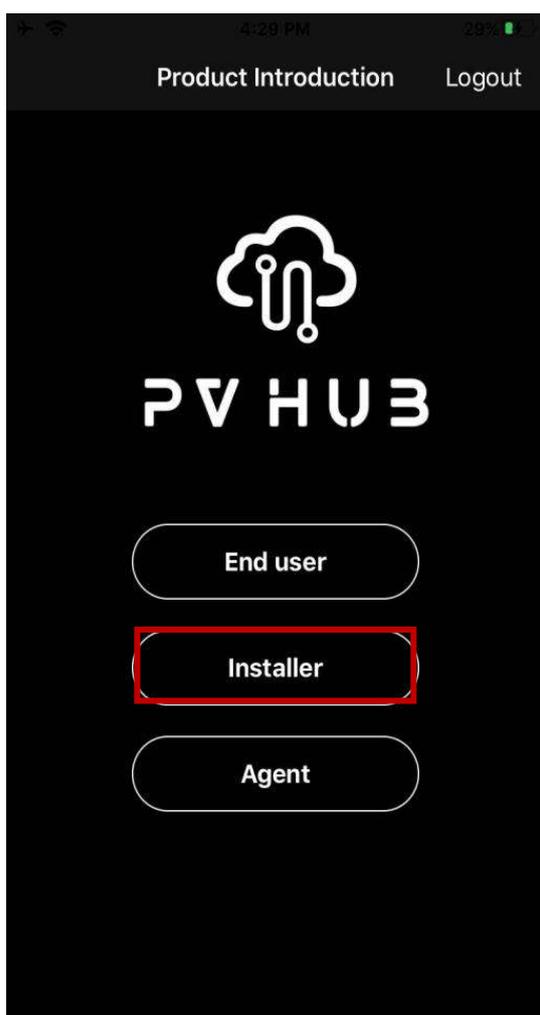

* If you are end user, please contact your installer for following steps.

Step 2:

Select your installer and enter the invitation, and click 'Join'.

Note: * Installer: The installer.

Agent: The agent/distributor/installation company.

For Computer Users

Step 1:

Open any browser and enter www.pv-hub.com on the address bar on top, click 'Sign Up'.

Note: * If you already have an installer/agent account, please press 'Sign in' and enter with your installer/agent account directly.

Step 2:

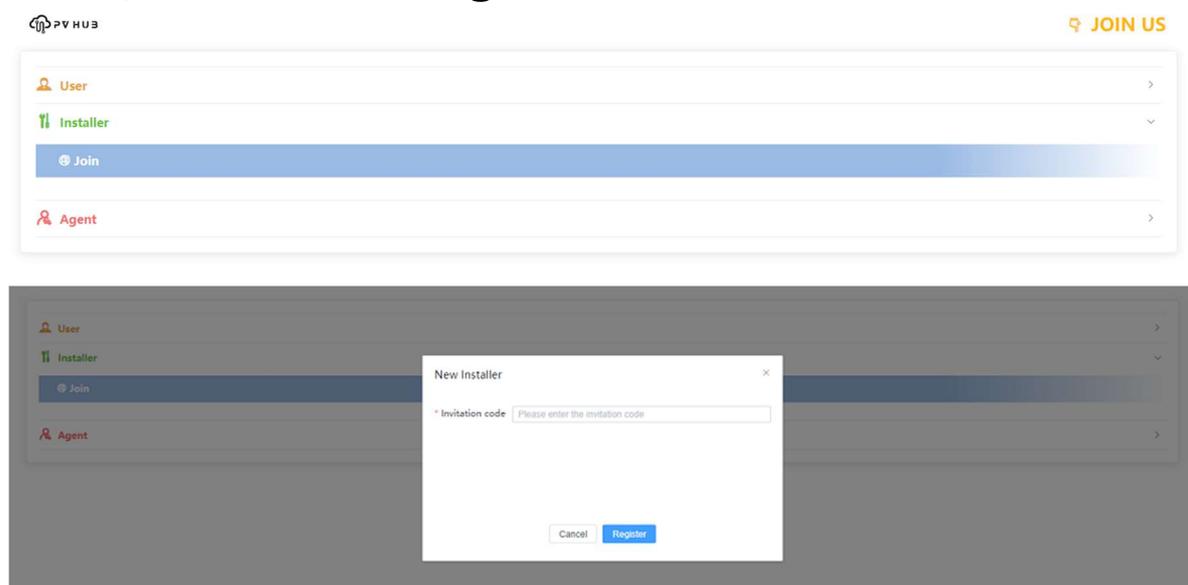

Enter information and click 'Sign up' to complete account registration.

Note: * If you are end user, please contact your installer for following steps.

Step 3:

Please select installer and enter the invitation code, then click 'Register'.

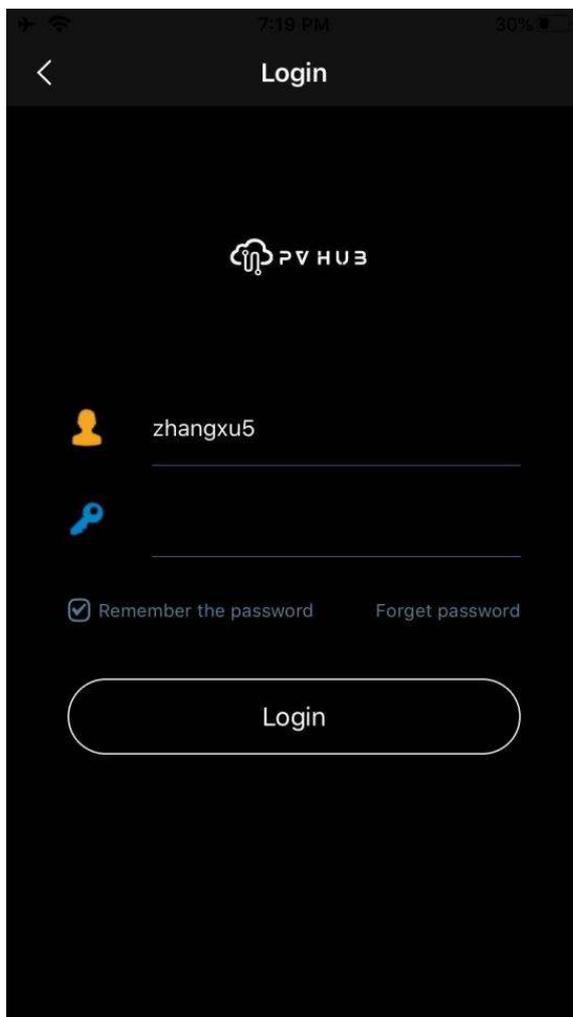

5 Create A Plant

For Smartphone Users

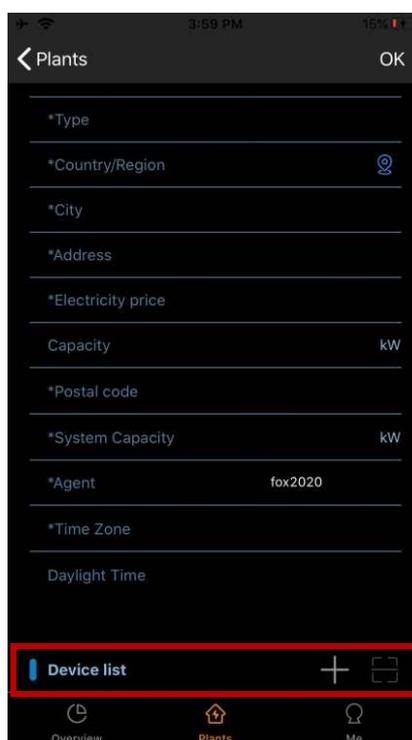

Step 1:

Open the APP, login with your Installer/agent account.

Step 2:

Press the '+' icon on the homepage to add plant. Press the scan icon next to the 'Device list' to scan the QR code label on the side of the Smart WiFi. Some basic information for this plant will populate automatically. Complete all required information and click 'OK' on the top right corner of the page.

Note: * After starting the APP, it will pop-up a message 'whether to allow positioning permissions', please select 'Allow'. For the Capacity, please fill in the actual capacity of the installation of solar panels.

For Computer Users

Press the 'New' on the homepage to add plant.
Complete all required information and click
'Create'.

The screenshot shows the 'New' form in the PV HUB application. The form is divided into two main sections: 'Plant' and 'Equipment'. The 'Plant' section contains the following fields:

- * Agent: A dropdown menu with 'foqsqj' selected.
- * Plant name: A text input field.
- * Plant type: A dropdown menu with 'please select'.
- * Country: A dropdown menu with 'China' selected.
- * Address: A text input field with '北京市' entered.
- * Time zone: A dropdown menu with 'please select'.
- * Postcode: A text input field.
- * Electricity price: A dropdown menu with 'please select'.
- * PV capacity: A text input field with '600' entered.

The 'Equipment' section contains the following field:

- * SN: A text input field.

At the bottom of the form, there are 'Cancel' and 'Create' buttons. To the right of the form is a map of Beijing, showing various landmarks and streets. The map includes labels for 'Beijing North Railway Station', 'Beijing South Railway Station', 'Xicheng', 'Dongcheng', 'Chiyuan', 'Beihai Park', 'Tiananmen Square', 'Temple of Heaven', and 'Fengtai'. The map is centered on the Xicheng area.
